

Arabic display problem yt_framework

Posted by Youness tallih - 27 Mar 2012 22:46

hello,

I congratulate you for the good work you made, I download template but when I change yt_framework_quickstart_j25_v1.0 Arabic question mark (???) is that you can help me

and thank you in advance

Dear Youness tallih,

I think that you should use the language package here.

Thanks

Hi spyros,

Could you please submit the ticket to technical department and tell us more about your problem? In there, you need to supply the url and describe your problem for technical supporter. We need more information to check for you.

Thanks!
