

Arabic display problem yt_framework

Posted by Youness tallih - 27 Mar 2012 22:46

hello,

I congratulate you for the good work you made, I download template but when I change yt_framework_quickstart_j25_v1.0 Arabic question mark (???) is that you can help me

and thank you in advance

Here's the site: alsoft-informatique.com/shop/

watch home and watch as virtuemart category1 Category2 is empty after changing the language

and I do not know how to send you admin password?

hello,

For my part I can not found the problem look at the pictures following that table menu and the title field well in utf8_general_ci

I leave you my email if you contacted me to give you admin password of the database

noumidianews@gmail.com
