

Video "slide show"

Posted by steven - 06 Jun 2012 05:56

Hey guys,

I am looking for a video slideshow like the one on this website mjalonzo.com/clients/sitka/ (look halfway the homepage at the module called 'videos')

Do you have anything I can use for this?

Thanks,

Steven

Hi Steven,

It's a nice module 😊
but now we haven't had. In the near future, we will take notice about that for the new module.

We have many slideshow modules for famous components of Joomla like: content, k2, sobi2, virtuemart, zoo... Please refer list of our slideshow module by searching on our site with "slideshow" word: www.smartaddons.com/component/k2/itemlist/search?searchword=slideshow.

Thanks!
