

Module does not load tweets

Posted by Robbert - 11 Mar 2012 01:30

Hi,

I have installed the Twitter module and I have set a Twitter Username. When I load the site, it does not load the tweets: www.thinkfishmedia.nl/Dev

What's the problem? Am I doing something wrong?

Dear Robbert,

Please check your site address.

I can not access it.

About your question, please check your Twitter Username again.

Thanks!

For my website doody-kami.com. It doesn't show the tweets still loading but when you click on follow us. It goes to the twitter page of the username

Can you help me

www.doody-kami.com/index.php/en/
