

How can i change the default link on this module?

Posted by NMC - 21 Oct 2011 20:39

So, when it opens the article it creates a new link, instead i want it to take me to the current article, i saw there is a post like this here but it didn't help because there is no box in my module where i can put ArticleID:my url, so can you please help me with that?

I don't have the Custom Url box...

Dear NMC

For other modules, we support this. For this module, we have not updated it yet

In the case, please submit a ticket, request to update this feature

Thanks

Thank you admin, but can't it be possible for me to just reupload this module?

I mean so it can have the required features?

I guess the ticket will require lot of time to be resolved and i cannot afford time loss right now.

Please can you suggest me anything else?

Dear NMC

You can download a module which supports this feature and then copy code to this module

Hope it helps

I'm actually using this one: mod_ytc_content_slideshow

Tell me please, which module supports this feature?

Dear NMC

It is slideshow II or Slideshow III Module
