

folder doesn't exist

Posted by Stefan Riva - 12 Feb 2012 13:35

Hi,

I can't get the modul to work. I always get the message "Folder doesn't exist!";.

Where is it related to; to the regular folder images?

I created a folder thumbs inside the images folder, copied pictures into it, but the error message keeps comming up. I can't find a explanation in the manual.

{imageboxes}

folder="images/thumbs";

rotate="1";

col="4";

image_width="750";

image_height="500";

show_type="0";

show_title="0";

sort_type="0";

panel_width="";

panel_height="";

row="";

Hi Mark Cock,

please check your inserting manner again.

Example:

```
{imageboxes} folder="images/thumbs" rotate="1" col="2" image_width="300" image_height="300" show_type="1" show_title="1" sort_type="1" panel_width="300" panel_height="300" row="2" {/imageboxes}
```

Thanks

Hi Mark,

Did your change value of 'folder' attribute?

"images/thumbs" is an example only. Please change it by your path. Make sure your path is exists.

Regards

Hi,

It's working now. Thanks a lot.

Regards, Mark.
