

"Video Picks" lightbox

Posted by clt iso - 13 Jun 2012 11:11

Can some one please please tell me what module and what correct lightbox extension to use

to have it exactly on the template, the "Video Picks" section. I wanted the lightbox to opne
on the main page, not to open another page.

I put much work on this template and don't want to change to another template because of this.

I will greatly appreciate this

Hi clt iso,

* It is the custom html module "Top video picks".

* You can set the value of Menu Assignment parameter in the module configuration in order to show only
in the home page again (see the attached image).

Thanks
