

Problem with the path of images

Posted by Dmitry111 - 08 Mar 2012 05:55

As you can see on this site (geo-vologda.ru/) , witch i just upload to the hosting, most of images cant be seen.

They have wrong ulr. Like that for example:

[geo-vologda.ru ///home2/rocavolo/public_html/geovologda/cache/mod_sj_basic_news/c02e701ec3412fc0fe8849fcca78e88c.jpeg](http://geo-vologda.ru/home2/rocavolo/public_html/geovologda/cache/mod_sj_basic_news/c02e701ec3412fc0fe8849fcca78e88c.jpeg)

How can i fix this problem?

Dear Dmitry111!

www.smartaddons.com/component/docman/cat_view/29-joomla-/61-joomla-templates

- You can dowloand and reinstall 'Plugin System - SJ Core'. Either update the new version of 'SJ Sport News'
