

Deleting Sample Images - SJ Business

Posted by Mohammad Siddeek - 05 Aug 2012 21:45

Dear Support Team,

I uploaded SJ Business & SJ News Quick Pakckages. But I am running out of space with my hosting partner.

Can you please suggest to delete some of your images which not use in design of templates ?

Regards

Siddeek

Hi Mohammad Siddeek,

All images are optimized in the sj business and sj news quick start packages.

I think that you can delete some unnecessary images or check the space of your hosting again.

Thanks

Hi,

what about to delete sampledata media folder in media manager containing fruitshop and parks folders ?

if so, will there be any effect on your design. I dont want to disturn your design.

Pls. advice.

Regards

Siddeek.
