What i must to do

Posted by Tomas - 03 Dec 2012 22:32

Hi there, some error

Fatal error: require_once() [function.require]: Failed opening required '__DIR__/core/helper.php' (include_path='.:/usr/local/pear') in /home/kandidat/kandidat.in.ua/03/modules/mod_sj_extraslider/mod_sj_extraslider.php on line 13

What i must to do

Dear Tomas,

We are sorry about the lateness.

We updated this issue on the accompanied extensions of sj company template.

You can download and install this module again.

Thanks

I'm getting this same error when I enable carousel, extra slider or gallery in this template. I just downloaded the template last week, but your previous message was posted a month ago to this other user to download a new version. What can I do to fix this issue (please don't say I must edit a whole bunch of files)..

Thanks in advance

Dear Kenneth Whistler,

Maybe this issue is appeared by your host.

Please receive the updated modules for joomla25 and re-install them.

Thanks

Thanks! That did the trick. Looks like you just might have some old code in the extensions bundled with this template. Now I can get on with making it pretty.
