

Filled square thumbnail missing

Posted by Alejandro Löwy - 06 Mar 2012 05:59

Hi,

I'm trying to create thumbs without streaching, fill or center and they must be represent the whole picture!!!

Please take a look in my links:

Wished thumbs with the free extension phoca gallery:(perfect !!)

artshop.regio-sites.de/phoca

and the extraslider of smartaddons with the fit mode:

artshop.regio-sites.de/extraslider

Do some body knows how can I show thumbs which fill the defined size, do not change proportions and get almost the picture?

user: guest

password: guest

-----important-----

I think the solution is following:

If I have an image that was 480x240, must be first reduced to 240x120 and then cropped to 120x120 - so you always have a perfectly filled square thumbnail image instead of resizing and filling the background to make your square thumbnail.

best regards and thanks!

Dear Alejandro Löwy

Please use Fill mode in this case

Thanks
