

Price showing as 0.00 on all products in slider

Posted by chris Ham - 03 Aug 2012 17:51

The prices are showing on my site as 0.00 on all products in the slider but not in the rest of the site have you any idea what i can do about this?

Joomla 2.5

virtuamart 2.0.8e

Hi chris Ham,

We are upgrading the virtuemart modules on virtuemart component 2.0.8

You can update this issue by opening the vmextrasliderreader.php in
"your_site/modules/mod_sj_vm_extraslider/core", finding:

price.virtuemart_product_price_id,

change to:

price.virtuemart_product_price_id,
price.product_price,

```
$product->prices = $calculator->getProductPrices($product->id);
```

change to:

```
$product->prices = $calculator->getProductPrices($product);
```

Thanks

I have implemented the changes, but i now receive the message.

There are no products matching selection!

I have now set the module to display as many products as possible, but i cant get any products to show on the slider now.

Hi chris Ham,

Please submit the ticket to our ticket system.

We need more information from your site to check this issue as soon as possible.

Thanks

Hi chris Ham,

Because you pasted the error code lines, you just receive the message.

There are no products matching selection!

price.virtuemart_product_price_id,

price.product_price,

//alteration here www.smartaddons.com/forum/28-sj-virtuemart-extra-slider/4372-price-showing-as-000-on-all-products-in-slider

=>

price.virtuemart_product_price_id,

price.product_price,

Please check the module on your site again.

Thanks
