

SJ CARS question

Posted by kiavash - 13 Jun 2012 12:28

Hi , I'm using SJ Cars template on joomla 2.5 , i want to know how can i remove a rectangular which there is information on it from slideshow ? i don't know what does the rectangular call !

And i have another question , My template's slideshow in the above of the front page is not working automatically , i must click on the next bottom to see next picture . can i do something with slideshow that it works automatically ? i mean it shows the pictures one after another one without have to click on any bottom .

Kiavash

Thank you

Hi kiavash,

* You can disable the information box by doing the following steps:

- setting the value of parameters as No in the configuration of Sj Vm Ajax Tabs module (see the attached image)

- opening the ajax-tabs.css file in "your_site/templates/sj_cars/html/mod_sj_vm_ajaxtabs";, finding:

```
div #tabslider-text-pro .inner {  
    background: url(&quot;../images/slide-show-desc-inner.png&quot;); no-repeat scroll left top  
transparent;  
    color: #FFFFFF;
```

```
display: block;
height: 289px;
margin: 3px;
padding: 15px;
width: 243px;
}
```

change to:

```
div #tabslider-text-pro .inner {
  /*background: url(&quot;../images/slide-show-desc-inner.png&quot;); no-repeat scroll left top
transparent;*/
  color: #FFFFFF;
  display: block;
  height: 289px;
  margin: 3px;
  padding: 15px;
  width: 243px;
}
```

```
div #tabslider-text-pro {
  background: url(&quot;../images/slide-show-desc.png&quot;); repeat scroll left top transparent;
  border-radius: 4px 4px 4px 4px;
  color: #FFFFFF;
  display: block;
  height: 325px;
  position: absolute;
  right: 12px;
  top: 55px;
  width: 279px;
}
```

change to:

```
div #tabslider-text-pro {  
  /* background: url(&quot;../images/slide-show-desc.png&quot;) repeat scroll left top transparent;*/  
  border-radius: 4px 4px 4px 4px;  
  color: #FFFFFF;  
  display: block;  
  height: 325px;  
  position: absolute;  
  right: 12px;  
  top: 55px;  
  width: 279px;  
}
```

* Sj Vm Ajax Tabs module is not supported to slide automatically now.

Thanks

Thank you so much for your help , and i have another problem that I'd like to know your suggestion to solve this problem .

error 404 is my big problem , i don't know how exactly to put pages from Sj cars instead of error 404 (page not found) , i saw Sj cars demo and it is really great ! i surf in its menus(shop , about us or ...)and i want my website have those pages also !!! 😊

i try to go to main menu/menu items and then i edit one of the menu bars , i chose single article and i put my article that i liked to have ! but after all it doesn't work ... i also want to have same pages as same as demo ! could you please help to solve this problem !?

Thank you
