

Extra fields in slideshow

Posted by Alex Koens - 01 Aug 2012 10:03

I added an external url as extrafield in a k2 item. And want to use the readmore button to echo them.

How do I do this?

Hi Alex Koens,

I understand your mean but SJ K2 Slideshow II module is not supported to use the extrafields now.

Thanks

Why is it not possible?

I'm using the Yt K2 Slideshow II

Hi Alex Koens,

If you want to use the extrafield in the module, you have to change much code.

Thanks

please tell me what the additional costs are for the extra code?

all i want is to use an external url for the readmore link/button
