

Virtuemart 2.0 not showing pics

Posted by Amaranta Arilla - 10 Mar 2012 05:25

Hi!

I bought a membership hoping to be able to use the VM extensions, but it aint working with Virtuemart 2.0.0.

I create a test site where I'm using the extension but it does not show the pics at all.

Am I missing something? Is there any manual up to date?.. I already tried out with the one at the www.smartaddons.com/joomla/extensions/extension-user-guides/270-yt-slideshow-ii-userguide and not helpfull at all.

You can see the result here

www.redescubretuvida.es/index.php/en/

If you need access please let me know

Hello Amaranta,

May be your pictures is not published in Virtuemart Media Manager. Please sure they are published first.

Thank you
