

## Error on the website front

Posted by Łukasz Langner - 28 Jul 2012 00:26

---

I have a site based on joomla 2.5.6, and the zoo ( [www.yootheme.com/zoo](http://www.yootheme.com/zoo) ). There are currently Revista YOOtheme templates ( [www.yootheme.com/demo/joomla/revista](http://www.yootheme.com/demo/joomla/revista) ).

He wants to replace the templates smartaddons SJ News.

I downloaded the appropriate files: sj\_news\_template\_j17-j25\_v1.3, and YT Plugin. After running and the front entrance to the site appeared the message:

*Sj Core is missing*

*You need to install this plugin for resizing images in Content Component and extensions of SmartAddons. Please click here to download the plugin.*

After clicking on "click here" smartaddons page appears with the message: Found 0 item

What to download, modify to make it work?

Hi Łukasz Langner,

You can download the sj core plugin at [www.smartaddons.com/joomla/downloads/yt-framework](http://www.smartaddons.com/joomla/downloads/yt-framework)

Thanks

---

I have installed and enabled:

YT Framework – YT Plugin

YT Framework – SJ Core

When I run the module from a group of zoo ( [www.smartaddons.com/joomla/extensions/commercial-extensions/itemlist/cattag?cattag=zoo&catid=17](http://www.smartaddons.com/joomla/extensions/commercial-extensions/itemlist/cattag?cattag=zoo&catid=17) ) is on the page where the module is running instead of the content of a message appears:

Fatal error: Call to a member function create() on a non-object in /TMtesty/plugins/system/sjcore/core/sjclass/components/zoo.php on line 64

Joomla 2.5.6

Zoo 2.6.2

Hi Łukasz Langner,

Please check the zoo component on your site again.

Do you really install it yet?

Thanks
